

[illegible]

This aerial map illustrates the planned route for the R4 road improvement project. The primary route is highlighted in yellow, starting from Katsuragi IC and passing through Kawasumi River IC, Nishikawa IC, and ending at Shimada City. Alternative routes are shown in green. The map also identifies several key features and construction phases:

- Katsuragi IC**: Starting point of the project.
- Kawasumi River IC**: A major interchange along the route.
- Nishikawa IC**: Another major interchange further down the route.
- Shimada City**: The final destination of the project.
- Itoya River Bridge**: A bridge crossing the Itoya River, labeled as "Itoya River Bridge (R4)".
- Construction Phases**: Various labels indicate different stages of the project, such as "Main Route Construction Phase 1", "Alternative Route Construction Phase 1", and "Alternative Route Construction Phase 2".
- Other Features**: The map shows surrounding terrain, rivers, and other roads, providing context for the project's location.
